Relocating to Florida in March

Profile

I am an experienced and driven Front End Developer with a comprehensive skill set encompassing HTML, CSS, JavaScript, jQuery, React, Bootstrap, and responsive design. My proficiency extends beyond technical capabilities to include a demonstrated knack for crafting visually captivating and intuitively navigable websites. Notably, I consistently deliver top-notch projects punctually and within budget constraints, reflecting my commitment to both quality and fiscal responsibility. I am actively seeking an invigorating opportunity where I can apply my expertise and make a valuable impact within a thriving organizational context. Eager to contribute to innovative projects and bring a distinctive blend of skills to a dynamic team, I am poised to make meaningful contributions that align with organizational goals and aspirations.

Work Experience

Political Media

Front End Developer

05/2019 – present

- Spearheaded the development of fully functional websites, encompassing the coding of layouts and shopping carts, culminating in a remarkable achievement of over \$100,000 in revenue during the inaugural week of a live site.
- Orchestrated collaborative efforts with a senior developer to conceive and execute the design and development of multiple pages and email layouts, contributing to a cohesive and visually compelling online presence.
- Leveraged advanced functionalities within CMS Systems to craft aesthetically pleasing and highly functional web pages, underscoring a commitment to delivering superior user experiences.
- Employed a sophisticated tech stack, including Bootstrap 4, CSS, JavaScript, and JQuery, to meticulously construct pages that seamlessly adapt to various devices, ensuring optimal mobile responsiveness.
- Demonstrated technical prowess by coding Dan Bongino's website, featuring a podcast player leveraging the history API for uninterrupted playback, thus enhancing the platform's overall functionality.

- Played a pivotal role in the coding of The Post Millennial website, a high-traffic news platform prominently featured on the popular podcast Tim Pool, attesting to the ability to contribute to projects with significant online visibility.

Canon USA

Front End Developer Contract

11/2018 – 01/2019

- *Championed a strategic partnership with senior developers in crafting multiple pages for canon.com, orchestrating a seamless integration marked by optimal functionality and elevated user experiences.*

- Spearheaded a comprehensive overhaul of the website's aesthetics, successfully redefining its visual identity to align with contemporary design trends. The result was a user-centric interface that transcends industry standards.

- Drove the expansion and enhanced content organization of the website through the development and seamless implementation of new pages, amplifying its digital footprint and user engagement.

Canon USA

Front End Developer Contract

07/2018 – 09/2018

- Orchestrated seamless content migration from one CMS to another through collaborative efforts with IT, Digital Marketing, and UI/UX teams, ensuring a smooth transition with minimal disruptions.

- Spearheaded a comprehensive redesign initiative, elevating the visual aesthetics and user experience of the new website. The result was a modernized interface that significantly enhanced overall appeal and user engagement.

- Demonstrated efficiency and expertise in problem resolution by swiftly addressing system transfer issues. Through diligent debugging and troubleshooting techniques, effectively mitigated challenges, ensuring the uninterrupted flow of operations during the migration process.

Strengths

HTML ▪ CSS ▪ JavaScript ▪ UI/UX ▪ Responsive Design ▪ Problem-solving ▪ Bootstrap ▪ JQuery ▪ React ▪ HTML Emails
